MEMORY GEMS

Do your best in the very best way. Do all the good you can, in every way you can, to everybody you can, and as long as you can.

Miss Lucy Gambrell, who attended the Greenville Female College this year, has returned. We learn that an effort is being made to take Miss Lucy out of this County. We are glad to hear of her good luck, but we regret to lose such a promising teacher. She will, however, be engaged in teaching. We wish her iccess, and feel sure she is worthy of it.

A REAL GOOD IDEA. MR. EDITOR: Allow me a few lines in your own especial corner of the INTEL-LIGENCER, for the purpose of entering a Piedmont curriculum for our bonny sweet girls, and one hundred times more attention to the intricacies of their mother tongue. In answer recently to a friend's question as to what I was doing, my reply was : "Trying to teach a foreign language-English." For truly what with the Africanisms still extant, the idioms of the upper country and the fearful and wonderful structure of American slang, that unmusicial but sonorous old tongue may be considered as having received its second apoplectic stroke.

Shades of Addison and Steele! Wander not towards cosmic shores, if you do not wish to witness the decadency of the language to which you gave such positive tone and richness of color that the page becomes a canvass, and the world form a softly shaded picture.

English of course has not the softness of Spanish, or the luscious sweetness of the old Ionic Greek, but properly spoken can be made very effective. I should call it the Wagner of languages-like his music, turbulent and strong, but yet with something picturesque about it "for a'

Arithmetic is very well, (so are the tin pans and cooking utensils in our kitchene) and if a girl is fitting herself for the position of a clerk, would be of great use to her; but women are generally the central stars of home-life, the goddesses of the drawing rooms, and as such their charm is exquisite-highly cultivated conversational powers.

Why not have in our female Colleges feasted my soul upon its beauty. It was lady professors of English literature and like a great carpet of buff and green mo-English poetry? Of course I am speaking of the girls only. As to the boys, let them become paradigms of arithmetic. but pray do not let the peachy-cheeked Misses of this decade become automata. wound up by clock work and warranted to solve at a given time so many geometrical problems. But I will draw my philological mantle around me, at least KIL COURTLAND.

Below we give the program of the closing exercises of Miss Lena Johnson's School, at Ivy Hollow, on 30th June ult. This was one of the most enjoyable occasions we have had the pleasure of attending. Miss Johnson is a good teacher, and her services are highly appreciated. This exhibition showed her training powers, and was complimentary to both pupils and teacher. There were present a large crowd to witness and enjoy this occasion. The order was very good, indeed. We trust Miss Lens can be induced to teach at Ivy Hollow again next year, for it would be hard to get another teacher that would give such general sat-

Remedles for the Cotton Grower.

The price of cotton has been steadily falling during the past few years. The prices of other things-including money -have been falling also. The prospects now, however, are that the price of cotton will fall below the proportion of pitched this year. We have made more that it had become proverbial, and a to darit over. Various remedies are suggested. The

up by inducing farmers to hold their was to decrease the acreage planted. That has been done in some neighborhoods while in others as much as ever or more than ever has been planted. Some men got the idea that the lessened acreage would cause a small crop and high prices and hastened to get in as much as Then somebody suggested that all farmers agree to plow up every fourth row in all their cotton fields so as to cut the crop off twenty-five per cent. at once. This was seriously urged. Now comes Major Harry Hammond, of Aiken, with the suggestion that heavy special tax be levied on the business of cotton planting so as to limit the number of persons who can engage in it and thereby keep the vield down and the price up. One great difficulty in the way of in-

telligent discussion of the subject is the absence of a knowledge of the difference between the cost and selling price of cotton. A railroad man can tell to the fraction of a cent how much it costs to run a train one mile, how much it costs to stop a train, what rates he must charge to make a profit. A mill president can give you to the fraction of a cent what every yard of cloth or pound of yarn costs. A merchant marks on every piece of his goods what it costs him, including freight, cartage, discounts or interest. We have never yet found a farmer who could tell anywhere near what his cotton cost him to make. Some men claim there is a profit in cotton at |

The Beggar's Fountain.

There is in Italy a fountain over which is the statute of a beggar drinking at a spring. It is called "The Beggar's Fountain," and this is its story : Once upon a time there lived a very proud and haughty man, who hated the poor and other things so that the profit in growing set himself above all the world who were it will be destroyed. A big crop was not as wealthy and well dressed as himmade last year and another big one is self, and his want of charity was so great cotton than the factories could or would beggar would no more have thought of take, and there is a big surplus of bales asking bread at his gate than of asking that the South will be the future iron-

him for all his fortune. There was a spring on his land, a sweet alliance tried last year to keep the price spring of cold water, and it was the only one for miles; many a wayfarer paused crops for ten cents and many loyal alli- to drink at it, but was never permitted to ance men obeyed orders and lost heavily do so. A servant was kept upon the by doing it. The next scheme suggested | watch to drive such persons away. Now there had never been known before any one so avaricious as to refuse a cup of cold water to his fellowmen, and the angels, talking among themselves, could not believe it, and one of them said to the

"It is impossible for any but Satan ossible to secure a big share in the rise. himself! I will go to earth, and prove that it is not true."

And this fair and holy angel disguised herself as a beggar woman, covered her golden hair with a black hood, and chose the moment when the master of the spring to come slowly up the road, and to pause before the fountain and humbly asked for a draught of its sweet water.

Instantly the servant who guarded the spot refused; but the angel, desiring to take news of a good deed, not of an evil one, back to heaven, went to the master himself, and said, "I am, as you see, a wanderer from afar. See how poor are my garments, how stained with travel. It is not surely at your bidding that your servant forbids me to drink, and even if it is, I pray you bid him let me drink, for I am very thirsty."

The rich man looked at her with scornful eyes and said :

"This is not a public fountain; you will find one in the next village." "The way is long," pleaded the angel, "and I am a woman and weak."

"Drive her away," said the rich man and, as he spoke, the beggar turned, but on the instant her black hood dropped seven cents. Others say it will not pay from her head and revealed floods of rippling golden hair-her unseemly rags We can not see any sense in trying to fell to the ground-and the shimmering change the laws of supply and demand. robes that angels wear shone in their offered than there is use of demand for poised on purple wings, with her hands the price must go down. Alabama Changes Place with Pennsyl-

WASHINGTON, June 25 .- Within week the Census Office will issue a bulle tin for iron ore, which will be, perhaps, one of the most remarkable, as well as one of the most suggestive, of the series of bulletins issued by that office. For the first time in the history of the country, Alabama will change places with Pennsylvania, as producing in one year more iron ore than the old Keystone State. This significant statement means liant young student of the Yale divinity

producing centre of the United States.

"The forthcoming statement will show

the industrial progress been more satisfactory than in the South," said Superintendent Porter to day, when interviewed on the subject. "It is a fact our statistics will show the South to be producing as much iron ore now as the whole country produced in 1870. The same is true as regards pig iron and bituminous coal. In my opinion, the changes that will come about in the near future in the manufacture of iron will make the South the great iron-producing region of the United States. This will not affect Pennsylvania, for we have abundant proof that in all these migrations the old centre takes up another class of manufacture, which is generally an advanced product of the same article. In England the old centres of iron manufacturers were Sheffield and Birmingham, but when South Wales and Barrow took the lead the former cities engaged in the production of steel and other things. The three future centres of iron manufacture will be Puget Sound, on the Pacific coast, Birmingham, East Tennessee and North Carolina, in the South, and the Pittsburg region in the North. Schooled in adversity, the South is already beginning to realize the blessings that follow from turning the sword into a ploughshare, and the truth of President Harrison's statement in his inaugural address is now ap-

All Sorts of Paragraphs.

- Bengal has lately had sixty earthuske shocks of more or less severity. - The cotton acreage of North Carolina averages a little more than one million acres. This year there is a falling off of two per cent.

-Straight streets are unknown in China. They are purposely made crooked to confuse Satan, as the Chinese believe the devil travels in a stright line.

- The Rev. Frank L. Stevens, a bril-

school, has been driven insane by Lieutenant 'Totten's theory that the world will come to an end in 1900. - Thirty-six "wet" Counties of Geor that in no part of the United States has gia have one convict to every 960 people. One hundred and one "dry" Counties in

the same State have one convict to every 1,320 people. - The Rev. Sam Jones says: "The nembership of a Church is divided into four separate and distinct classes. The first will pray but won't pay; the second will pay but won't pray; the third won't either pay or pray; the fourth are the few who both pay and pray."

-It is said there is a tract of forest trees in southern Oregon embracing about 16.000 square miles, which, cut and sold at \$10 per 1,000 feet, would pay our national debt twice over. It is estimated that the amount of merchantable timberstanding will reach 400,000,000,000 feet - Capt. J. C. Boyd owns a fifteen

month's old heifer that has never calved, but is giving a half gallon of milk every day. The mother of the heifer also gave milk before calving. Captain Boyd believes the animal will give a gallon or more of milk in a few weeks,- Greenville - The political revolution in Kansas ecomes easy of explanation when it is

considered that twenty-two newspapers in the State are edited by women. And this enumeration does not embrace the many wives of editors who write editorial as well as society matters for their husbands' journals. - Japan's Emperor has decreed that every man who provokes a duel or accepta a challenge shall pay a heavy fine and

serve from six months to two years in

the galleys. The taunting of a man for

refusal to fight when challenged will be regarded as slander, and will be so treated by the courts. - It is expected that the Grady Memce rial Hospital in Atlanta will be completed by the 1st of next December. So far. amount of about \$18,000 still to be raised.

- Squire James Ritter, believed to be the largest man in the South, died at Elm Springs, Ark., last week. Ritter was seventy years old and weighed 540 pounds. He had his coffin made two years ago, and for two seasons used it as a granery. It was made of walnut and held twenty-two bushels of wheat. Twelve men acted as pall bearers, and it took four strong ropes

to lower the coffin into the grave. - A man at Jansen, Fla., will realize \$9,000 this year from an acre of pinearples, while Major Ryals, of Chatham County, Ga., has a truck farm of 125 acres, near Savannah, which yields him \$100,-000 a year. His chief crop is Irish potstoes, of which he has 80 acres. In addition he raised cabbages, tomatoes, beans, cucumbers, onions and other small vegetables. His income from onions is \$700

- A little oblong steel box opening with combination lock, passed through the Chicago custom house the other morning, consigned to an Illinois watch company. This insignificant looking affair contained diamonds and rubies by the hundred, that were for settings for watches. The value of the stones was placed at \$150,000 and the duty on them was a small fortune. The goods were

delivered by a special messenger. - Most of cur readers heard of the lowa calf case that went on in the courts for twenty years and bankrupted fifty or more persons, the calves in the first place being worth just \$7.50. The Iowa calf case is now paralleled by the Arkansas shoat case. A shoat was killed. Two men were accused of the deed. They became bankrupt defending themselves. spending \$6,000. Besides that the county is out \$1,000. The pig was worth

- Before the war there was no such flower as the daisy in Virginia, Now the fields just around Richmond are white with them. This is especially so of the late battlefields about the Chickshoming River, and wherever the Federals had encampments. An investigation shows that the seeds of the prolific daisy were brought here in the bales of hay brought by the Union soldiers to Virginia when they were encamped near the city. An old battery west of Richmond is the spot

from which the daisy began to spread. Entitled to the Best.
